

Hamza Bahamdan (Saudi National)

Software Engineer / Unity Developer | Backend / Full-Stack Developer | Cloud & Real-Time Systems
Jeddah, Saudi Arabia | +966 50 667 7792 | hamza.bahamdan@gmail.com
LinkedIn | GitHub | Arabic (native), English (fluent)

Professional Summary

Mid-level **Software Engineer** with hands-on experience contributing to production systems across backend services, cloud-hosted web applications, and real-time platforms serving millions of users. Strong foundation in C#, Java, and JavaScript, with practical exposure to APIs, distributed systems, cloud deployment, and collaborative development in live environments.

Work Experience

- Software Engineer / Unity Developer | Table Knight Games** Remote
Mar 2023 – Present
 - Game programmer on *Undermire*, a 4-player online co-op title in development for **Steam** on **FishNet**: gameplay features, art and animation integration, UI built from designer references, and Arabic support in the team's localization system.
 - Contributed to development and maintenance of a production application serving **2M+ users**, working on client logic, backend integrations, and real-time systems.
 - Handled reconnection, stale data, and out-of-order updates to keep the client in sync with the server.
 - Integrated backend services using **Firebase** and **PlayFab**, handling authentication, configuration, and live data synchronization.
 - Implemented feature updates using **Remote Config**, enabling faster iteration without full redeployments.
- Software Engineer / Unity Developer | Tamatem Games** Amman, Jordan
Apr 2024 – Oct 2024
 - Implemented event-driven systems and gameplay features with emphasis on modular design and maintainability.
 - Supported automated Android and iOS build pipelines, improving release reliability and QA efficiency.
- Software Development Intern | Tamatem Games** Amman, Jordan
Oct 2023 – Apr 2024
 - Contributed pull requests improving stability in a live multi-service real-time backend, and supported a networking stack migration across the client and its backing services.
- Software Development Intern | Bupa Arabia** Jeddah, Saudi Arabia
Jun 2021 – Aug 2021
 - Ported internal libraries from C# to Java, improving cross-platform compatibility and maintainability.

Projects

- Full-Stack Web Application [Live App]** Jan 2025 – Feb 2025
React, Express.js, AWS EC2, Vercel, Riot API
 - Built a full-stack web application consuming REST APIs to process and visualize real-time data.
 - Deployed backend services on **AWS EC2** and frontend on **Vercel** for global accessibility.
- AI Voice Emotion Recognition System (AgentX Hackathon 2025)** 2025
Unity (C#), Gemini API, Python, FastAPI, Audio Processing
 - Developed a real-time AI system that analyzes player voice input to detect emotional states (e.g., happy, sad, angry) and dynamically influence in-game behavior.
 - Integrated **Gemini API** for emotion classification and designed an alternative pipeline using pre-trained **Python** models exposed via **FastAPI**, enabling both cloud-based and local deployment.

Education

- University of Tulsa** — Bachelor of Science in Computer Science Tulsa, OK | May 2022
- Metropolia University of Applied Sciences** — Game Development Certificate (6 months) Helsinki | Apr 2025
- Saudi Digital Academy** — Advanced Game Development Bootcamp (4 months) Jeddah | Apr 2023

Technical Skills

Languages: C#, Java, JavaScript, HTML/CSS, Bash
Backend & Web: REST APIs, Express.js, Client-Server Architecture, Real-Time Systems
Cloud & Services: AWS (EC2), Claude Code, Firebase, PlayFab, Photon, Vercel, Remote Config
Tools: Git, JetBrains Rider, CI/CD, Debugging, Version Control

Certifications

Unity Certified Associate – Game Developer | Unity Certified Associate – Programmer
